

MEMBERSHIP APPLICATION

Southern Gulf NRM is the natural resource management (NRM) organisation for the Southern Gulf region of north west Queensland. We work with our partners and the community to protect our region's natural resources and maintain the prosperity of industries and communities that rely on these. The region comprises all the land whose creeks and rivers run into the south of the Gulf of Carpentaria.

The organisation provides management, planning, facilitation and on-ground services which assist our sectors: Indigenous, Mining, Pastoral, Local Government, Community, Tourism and other Industries, and Conservation to achieve measurable landscape outcomes.

Services provided include weed control, riparian protection, biodiversity conservation and improved grazing management, fire management, coastal protection and building NRM capacity across communities. Workshop and education programs with schools and rural/remote communities, mine site rehabilitation and conservation for cultural heritage are also priorities.
