FOR IMMEDIATE RELEASE

‘Southern Gulf helps landholders get to Longreach’

Southern Gulf NRM are proud to announce an offer of financial support for landholders to attend the 2021 ‘NRM in the Rangelands’ conference, to be held later in the year.

The Rangelands region encompasses nearly 80% of Australia’s interior, housing a myriad of varied terrain. Vital to all these differing landscape types is water, a source which has been a scarce commodity during the recent drought conditions.

The conference, which runs from October 5th – 8th, in Longreach Qld, has a lineup of key note speakers, panel discussions and practical demonstrations which focus strongly on the collaboration and sharing of innovative and exciting ideas that are to improve future drought resilience for the community and the environment.

Southern Gulf NRM are passionate about ensuring this type of knowledge is shared and distributed as much as possible. For this reason, we are offering financial assistance for up to 20 landholders from the Southern Gulf regional area to attend the conference.

Up to 10 young in the grazing industry (25 years and under) will receive a contribution of \$1000 each to put toward their trip and up to 10 landholders or managers who attend will also receive \$800 each.

Eligible candidates for each category are encouraged to contact the offices of Southern Gulf NRM as soon as possible to ensure they do not miss out on this opportunity.

For more information candidates can visit our social media platforms or website or can simply contact our friendly team at any time.

For further reference please find below an informative flyer which outlines the campaign.

Southern Gulf is the Natural Resource Management organisation for the Southern Gulf region of northwest Queensland. We work with the community to deliver projects that improve and protect our region's natural resources and to maintain the prosperity of industries that rely on these. The Southern Gulf water catchment region includes all the land whose creeks and rivers run into the southern Gulf of Carpentaria. This encompasses an area of 215,000km square².
