Southern Gulf NRM

MEDIA RELEASE

7 February 2024

FOR IMMEDIATE RELEASE

Southern Gulf NRM Appoints Pru Wharton as New General Manager

The Chair of Southern Gulf NRM, Megan Munchenberg, is delighted to announce the appointment of Pru Wharton as the organisation's new General Manager. This decision was reached by the Board of Directors, reflecting their confidence in Pru's capabilities and her proven dedication to Southern Gulf NRM's mission.

Pru brings a wealth of experience to her new role, having been an integral part of the Southern Gulf NRM team since 2014. Prior to her appointment as General Manager, Pru served as the Regional Agricultural Landcare Facilitator, where she played a pivotal role in supporting and fostering growth within the agricultural and landcare sectors. Her work involved close collaboration with land managers, indigenous groups, community groups, and councils, facilitating the adoption of sustainable land management practices and preserving the landscape of the Southern Gulf region.

In September 2023, Pru took on the role of Interim Operations Manager, further showcasing her leadership abilities and deep understanding of the challenges and opportunities facing the NRM sector. Her tenure in this position provided stability, support, and invaluable insight into the operational landscape of the organisation.

As General Manager, Pru will work closely with the Chief Executive Officer and Business Manager to drive the strategic and operational objectives set forth by the Board of Directors. She will provide leadership and oversight to the Projects team, ensuring that Southern Gulf NRM continues to make meaningful contributions to environmental conservation and sustainable land management.

The Board of Directors extends their warmest congratulations to Pru on her well-deserved appointment and looks forward to the continued success of Southern Gulf NRM.

Southern Gulf NRM is the Natural Resource Management organisation for the Southern Gulf region of north west Queensland. We work with the community to deliver projects that improve and protect our region's natural resources and to maintain the prosperity of industries that rely on these. The Southern Gulf water catchment region includes all the land whose creeks and rivers run into the southern Gulf of Carpentaria. This encompasses an area of 215,000km square^2.
